

Adriana Benalcazar
Vega Tobar S.A.
Quito, Ecuador

April 6, 2017

Dear Adriana,

Re: EDGE project: Edificio Edwards (# 011)

It gives me great pleasure to recognize Vega Tobar S.A. by awarding Preliminary EDGE Certificate for the Edificio Edwards project located in Quito, Ecuador. Please find attached your Preliminary EDGE Certificates for each unit type which recognizes that the design choices made for this project predict energy savings in the range of 28% to 38% (based on unit type), water savings in the range of 28% to 30% (based on unit type), and embodied energy savings in the range of 36% to 41% (based on unit type). Congratulations to you and your team on this impressive accomplishment!

You will also find attached the EDGE Design Audit Report, and updated EDGE software files that incorporate the Design Audit findings. Additionally, we have also attached a .zip file containing different formats of the EDGE logo for marketing your project to your customers. For questions related to use of the EDGE logo, please refer to IFC's [Brand Assets](#). If you would like to promote your project further, you may also like to complete this [form](#) to Request an EDGE Project Study to be published on IFC's [website](#).

We are looking forward to continuing to work with your team through the final stage of EDGE certification and please don't hesitate to reach out to us at edge@gbci.org or to me directly (salexander@gbci.org) should you have any questions, or insights/suggestions for improvement to EDGE to increase its effectiveness and uptake within the industry.

We applaud you for your demonstrated corporate commitment to sustainable innovation and environmental excellence by choosing to certify with EDGE. Working together we can create an ecosystem where green buildings become the new normal, not the exception!

Many congratulations again,

Best Regards,

Sarah Alexander, LEED AP
